

Navid Kamal

Summary

Software engineer with a Bachelor's degree in Software Engineering and practical experience in full-stack development. Passionate about machine learning and AI applications. Seeking opportunities to leverage technical skills and AI knowledge to develop innovative software solutions.

Education

Aug 2021 – Mar 2026 **B.Sc., Software Engineering**, *Islamic University of Technology*, Dhaka, Bangladesh

Technical Skills

Languages C++, Python, JavaScript, Java
Frameworks & Tools React, Spring Boot, LangChain, FastAPI, WebSockets

Projects

- 2024 **UniSphere**, *AI-powered University App*
- Developed a social networking platform designed specifically for university students, enabling them to connect, collaborate, and share resources within their academic community
 - Technologies used: React, LangChain, Node.js, Express, MongoDB
 - Achievement:** Champion project at MIST Hackathon 2024
 - Links:** <https://github.com/navid1111/UniSphere>
- 2024 **TurfMania**, *All-in-One Turf Booking App*
- Developed a comprehensive turf booking platform that connects sports enthusiasts with turf facilities
 - Implemented a modular architecture with separate interfaces for clients, organization owners, and administrators
 - Created a seamless experience for all stakeholders involved in the turf booking ecosystem
 - Technologies used: React, Node.js, Express, MongoDB
 - Links:**
 - Client Portal: <https://turfmania.vercel.app>
 - Admin Dashboard: <https://turfmania-admin.vercel.app>
 - Organization Portal: <https://turfmania-organization.vercel.app>
 - GitHub: <https://github.com/navid1111/TurfMania>

Competitions & Activities

- 2024 **MIST Hackathon**, *Champion*
- Developed UniSphere, an AI-powered university networking platform
 - Collaborated in a team of 4 to design and implement the solution within 36 hours
 - Leveraged React, LangChain, and MongoDB to create an innovative solution

2024 **KUET AI Hackathon**, *Participant*

- Developed an AI-driven solution for [specific problem statement]
- Utilized machine learning algorithms and data analytics to address real-world challenges
- Gained experience in rapid prototyping and presenting technical solutions

2025 **Geeky Solutions Learnathon**, *Participant*

- Participated in intensive learning sessions focused on emerging technologies
- Collaborated with industry professionals and peers on practical projects
- Enhanced skills in [specific technologies or frameworks covered]
